DETAILED ACTION

Status of the Application

Acknowledgement is made of the receipt of the Declaration and the Priority Papers (Certified Copy), both filed 03/29/02, the Priority Papers filed 10/19/01 and the Transmittal Letter for the IDS filed 06/27/02.

Claims 1-58 are pending. Claims 1-58 are subject to an Election/Restriction requirement.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-51 and 54-56, drawn to a pharmaceutical composition comprising (a) a tiotropium salt and (b) an antihistamine and a method of treating allergic or non-allergic rhinitis and a kit comprising one or more unit dosage containers containing a pharmaceutical composition, classified in class 424, subclasses 489, 45 and 451.
- II. Claim 52, drawn to a pharmaceutical composition consisting essentially of (a) a tiotropium salt, (b) an antihistamine, (c) a solvent, (d) benzalkonium chloride and (e) sodium edetate, classified in class 514, subclass 566.

- III. Claim 53, drawn to a pharmaceutical composition consisting essentially of (a) a tiotropium salt, (b) an antihistamine, (c) a solvent and (d) benzalkonium chloride, classified in class 514, subclasses 643 and 751.
- IV. Claims 57-58, drawn to a kit comprising (a) a first container and (b) a second container, classified in class 424, subclass 400.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I, III and IV, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Groups I, II and IV, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group IV is not required for Groups I, II and III, restriction for examination purposes as indicated is proper.

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

Election of Form:

- I. Powder (inhalable)
- II. Aerosol (propellant-containing metering)
- III. Inhalable Solution or Suspension (propellant-free)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
